

## **MindLink and ISEC7 Group enter strategic partnership to provide highly secure Chat Enabled Collaboration solutions to enterprises**

**London, UK – 19 January 2016:** MindLink Software (MindLink), developer of secure Chat Enabled Collaboration (CEC) tools for businesses, and ISEC7 Group, a leader in consultancy and software development for mobile enterprise solutions, have today announced their strategic partnership to offer enterprises secure and compliant collaboration tools, in the office and on the go.

The ability to share ideas and collaborate on projects is crucial to any organisation's success in the modern business world. However, security and compliance concerns, as well as the need for mobility and system integration, has set the bar high for Chat Enabled Collaboration providers. By partnering with ISEC7 Group, with its track record in enterprise mobility and security solutions, MindLink and ISEC7 Group can now bring a new, secure dimension to how sensitive business information is shared within firms.

ISEC7's strong footprint in the DACH region will allow MindLink to expand into a market that is highly security conscious with exceeding demands for tried and tested, enterprise-ready collaboration solutions.

*"Our close alignment in terms of solution focus and the business problems we solve has been a perfect fit for our partnership," says Greg Finnigan, Channel Director, MindLink Software. "Both our firms have the goal to enable companies to build a digitally-enabled collaborative workplace, all whilst putting major emphasis on data security, privacy and compliance."*

The partnership comes only weeks after Greg Finnigan joined MindLink to ramp up Channel efforts as a fundamental building block for MindLink's growing business.

Both companies have been Microsoft Gold Partners since inception, as well as being part of the BlackBerry Alliance Partnership Scheme.

*"Partnering with MindLink is an example of our commitment to providing our customers with a highly secure, industry leading collaboration application. Working together strengthens our product portfolio for key industries and allows us to offer our clients a truly industry leading offering." says Sven Starke, Head of Business Unit Mobile App & Content, ISEC7 Group. "We're pleased to be working with MindLink, both of us innovators in enterprise mobility, collaboration and security solutions."*

### **About ISEC7 Group AG**

The ISEC7 Group AG ([www.isec7.com](http://www.isec7.com)) is a global provider of mobile business services and software solutions. The company was one of the first movers in mobilising company and business processes. Today, ISEC7 has numerous renowned companies and governmental organisations as committed customers. The company continually invests in the evaluation and development of new technologies. ISEC7 solutions, such as ISEC7 EMM Suite, ISEC7 Mobile Exchange Delegate, ISEC7 Mobility for SAP and ISEC7 Mobility Cloud have proven to be ground-breaking in the mobility sector. The ISEC7 EMM Suite, a comprehensive globally applicable MDM solution, has been presented as the “Most Innovative Enterprise Application”. ISEC7 Mobility for SAP allows access to SAP backend without the need for additional middleware. The ISEC7 solution ‘Mobile Exchange Delegate’ ensures mobile access to Microsoft Outlook calendar, email and contacts from third parties via BlackBerry or iPhone. ISEC7 Mobility Cloud is an innovative and ground-breaking Managed Service for the provision of customised Enterprise Mobility infrastructures based on EMM solutions like the ISEC7 EMM Suite, BlackBerry Enterprise Service 12, MobileIron, Samsung EMM, Microsoft EMS, Good or Airwatch. ISEC7 was founded in Hamburg/Germany in 2003. The company operates globally with offices in Germany, UK, Spain, Switzerland, USA and Australia.
