Challenge mobile security – ISEC7 informs at biggest cloud and virtualisation conference

In a joint lecture with Deutsche Telekom, ISEC7 CEO Marco Gocht talks about secure mobile services for medium-sized businesses.

Hamburg, September 20, 2016 – The 10th Cloud Computing & Virtualisation Technology Conference will take place in Hamburg on September 28, 2016. In top-class keynotes, exciting specialist lectures and workshops as well as in round table talks, cloud and virtualisation topics will be discussed and current technologies will be introduced. The Hamburg enterprise mobility expert ISEC7 Group is taking an active part: Marco Gocht, CEO ISEC7 Group, together with Peter Kleimeier, Director New Business Telekom Deutschland GmbH, will report on "Secure mobile services of the IT service provider in medium-sized businesses on bimodal Telekom IaaS".

The lecture focuses on the question what enterprise mobility from the cloud can perform today, what must be considered and which pitfalls should be avoided. Referring to a project on the basis of the bimodal multicloud portfolio of Telekom, experiences and advantages of the multicloud Intrastructure-as-a-Service of Telekom will be represented as the basis for own Managed Services.

Marco Gocht explains: "The enterprise mobility trend still exists. But there is a paradigm shift regarding data protection versus infrastructure protection. Enterprises have to open up and use their data to persist in the digital world. Most companies focus on using their data within the company itself and on protecting their infrastructure. Today however, data has to be shared with clients, suppliers and partners in real time – to survive on the market and create additional value. It is important to protect the individual data record, respectively the information itself, and to ensure that only authorised individuals can access this information – at every time, in every infrastructure and from every device – secured by modern infrastructure and the right software solution."

The ISEC7 Group has more than 14 years of experience in developing, implementing and operating mobile infrastructures. Together with its clients, the ISEC7 experts define mobile strategies, analyse existing organisational processes and assist with the introduction of mobile technologies.

About ISEC7 Group
The ISEC7 Group (www.isec7.com) is a global provider of mobile business services and software solutions. The company was one of the first movers in mobilising company and business processes. Today, ISEC7 has numerous renowned companies and governmental organisations as committed customers.

The company continually invests in the evaluation and development of new technologies. ISEC7 solutions, such as ISEC7 EMM Suite, ISEC7 Mobile Exchange Delegate, ISEC7 Mobility *for SAP* and ISEC7 Mobility Cloud have proven to be ground-breaking in the mobility sector.

The ISEC7 EMM Suite, a comprehensive globally applicable MDM solution, has been presented as the "Most Innovative Enterprise Application". ISEC7 Mobility *for SAP* allows access to SAP backend without the need for additional middleware. The solution 'ISEC7 Mobile Exchange Delegate' ensures mobile access to Microsoft Outlook calendar, email and contacts from third parties via BlackBerry, Android or iPhone. ISEC7 Mobility Cloud is an innovative and ground-breaking Managed Service for the provision of customised Enterprise Mobility infrastructures based on EMM solutions like the ISEC7 EMM Suite, BlackBerry Enterprise Service 12, Good, MobileIron, Samsung EMM, Microsoft EMS or Airwatch.

ISEC7 was founded in Hamburg/Germany in 2003. The company operates globally with offices in Germany, UK, Spain, Switzerland, USA and Australia.
