

PRESS RELEASE

Mobilising business processes securely with ISEC7 solutions

In 2017, the Hamburg-based company puts a strong focus on mobile security.

Hamburg, February 23, 2017 – The mobilisation of business processes in companies is nowadays taking place to a large extent. Besides issues like the optimal connection and presentation on mobile devices, it is mobile security that is becoming increasingly important. Since 2003, ISEC7 Group (ISEC7) has been one of the first movers in the area of enterprise mobility and it is gradually extending its position on an international scale. The company is familiar with the current challenges and expectations with regards to security. ISEC7 experts advise industries, public organisations as well as public authorities and service providers on all issues regarding the enhanced protection of mobile infrastructures.

Mobile security is one of ISEC7's core issues: The increasing number of mobile devices or endpoints, hybrid infrastructures and the growing processing of mobile data and documents on smartphones and tablets, come along with the companies' needs for protection. Extended data encryption, enterprise identity, app reputation or auditing – ISEC7 is a qualified partner for the demand that is rising exponentially. At the end of 2016, CEO Marco Gocht led an expert roundtable with representatives of BlackBerry and Samsung on the 4th Enterprise Mobility Summit, discussing the following key issues: How to flexibly and securely integrate Android into enterprise IT and are security and efficiency excluding each other? Moreover, Marco Gocht reported about mobilising sales and the acceptance of the mobile use of SAP CRM.

Marco Gocht, CEO ISEC7 Group, explains: „Companies need to mobilise their data to respond to current market requirements. In times of rising cyber attacks and higher IT compliance demands, enterprises need to raise their awareness of mobile security issues. During the past months, ISEC7 has expanded its portfolio with focus on mobile security and mobile productivity to consult their customers during their digital transformation process. Already, a clear trend for 2017 can be seen - European and German companies move towards managed services or towards cloud for managed mobility. Even customers from highly regulated industries rely on ISEC7 and their mobile solutions.“

With its international presence, ISEC7 supports globally acting medium-sized companies to keep up with the challenges of mobilisation. Out of their foreign subsidiaries in NA, EMEA and APAC, the ISEC7 experts can act competently and quickly. Thus, the international awareness of ISEC7 significantly grew in 2016. During the past months, ISEC7 received several awards: the company earned a place on the US CIO Review List 2016 of the 20 Most Promising Enterprise Mobility Solution Providers, it has been awarded by Crisp Research AG for being one of the best Service Providers for Unified Endpoint Management (UEM) and it received the Mid-Market Achievement Award 2016 by Corporate Vision Magazin (CV Magazin). Furthermore, the EEMM expert is one of the first international Black Berry partners to receive the Platinum Partner Status of the „BlackBerry Enterprise Partner Program“. Additionally, the CV Magazin awarded Marco Gocht as „Managed Mobility

Services CEO of the Year 2016“.

The ISEC7 has nearly 15 years of experience in developing, implementing and operating mobile infrastructures. Together with its clients, the ISEC7 experts define mobile strategies, analyse existing organisational processes and assist with the introduction of mobile infrastructures and the securing of mobile business processes.

About ISEC7 Group

The ISEC7 Group (www.isec7.com) is a global provider of mobile business services and software solutions. The company was one of the first movers in mobilising company and business processes. Today, ISEC7 has numerous renowned companies and governmental organisations as committed customers. The company continually invests in the evaluation and development of new technologies. ISEC7 solutions, such as ISEC7 EMM Suite, ISEC7 Mobile Exchange Delegate, ISEC7 Mobility *for SAP* and ISEC7 Mobility Cloud have proven to be ground-breaking in the mobility sector.

The ISEC7 EMM Suite, a comprehensive globally applicable MDM solution, has been presented as the “Most Innovative Enterprise Application”. ISEC7 Mobility *for SAP* allows access to SAP backend without the need for additional middleware. The solution ‘ISEC7 Mobile Exchange Delegate’ ensures mobile access to Microsoft Outlook calendar, email and contacts from third parties via BlackBerry, Android or iPhone. ISEC7 Mobility Cloud is an innovative and ground-breaking Managed Service for the provision of customised Enterprise Mobility infrastructures based on EMM solutions like the ISEC7 EMM Suite, BlackBerry Enterprise Service 12, Good, MobileIron, Samsung EMM, Microsoft EMS or Airwatch.

ISEC7 was founded in Hamburg/Germany in 2003. The company operates globally with offices in Germany, UK, Spain, Switzerland, USA and Australia.
