The background of the slide features a black and white photograph of a person walking away from the camera down a long, narrow tunnel made of brick walls. The person is silhouetted against a bright light at the end of the tunnel. The entire image is overlaid with a geometric pattern of dark blue and teal triangles.

ETHICAL WALL

ETHICAL WALL

Control who can communicate with whom

Federation with external, users/
Guests

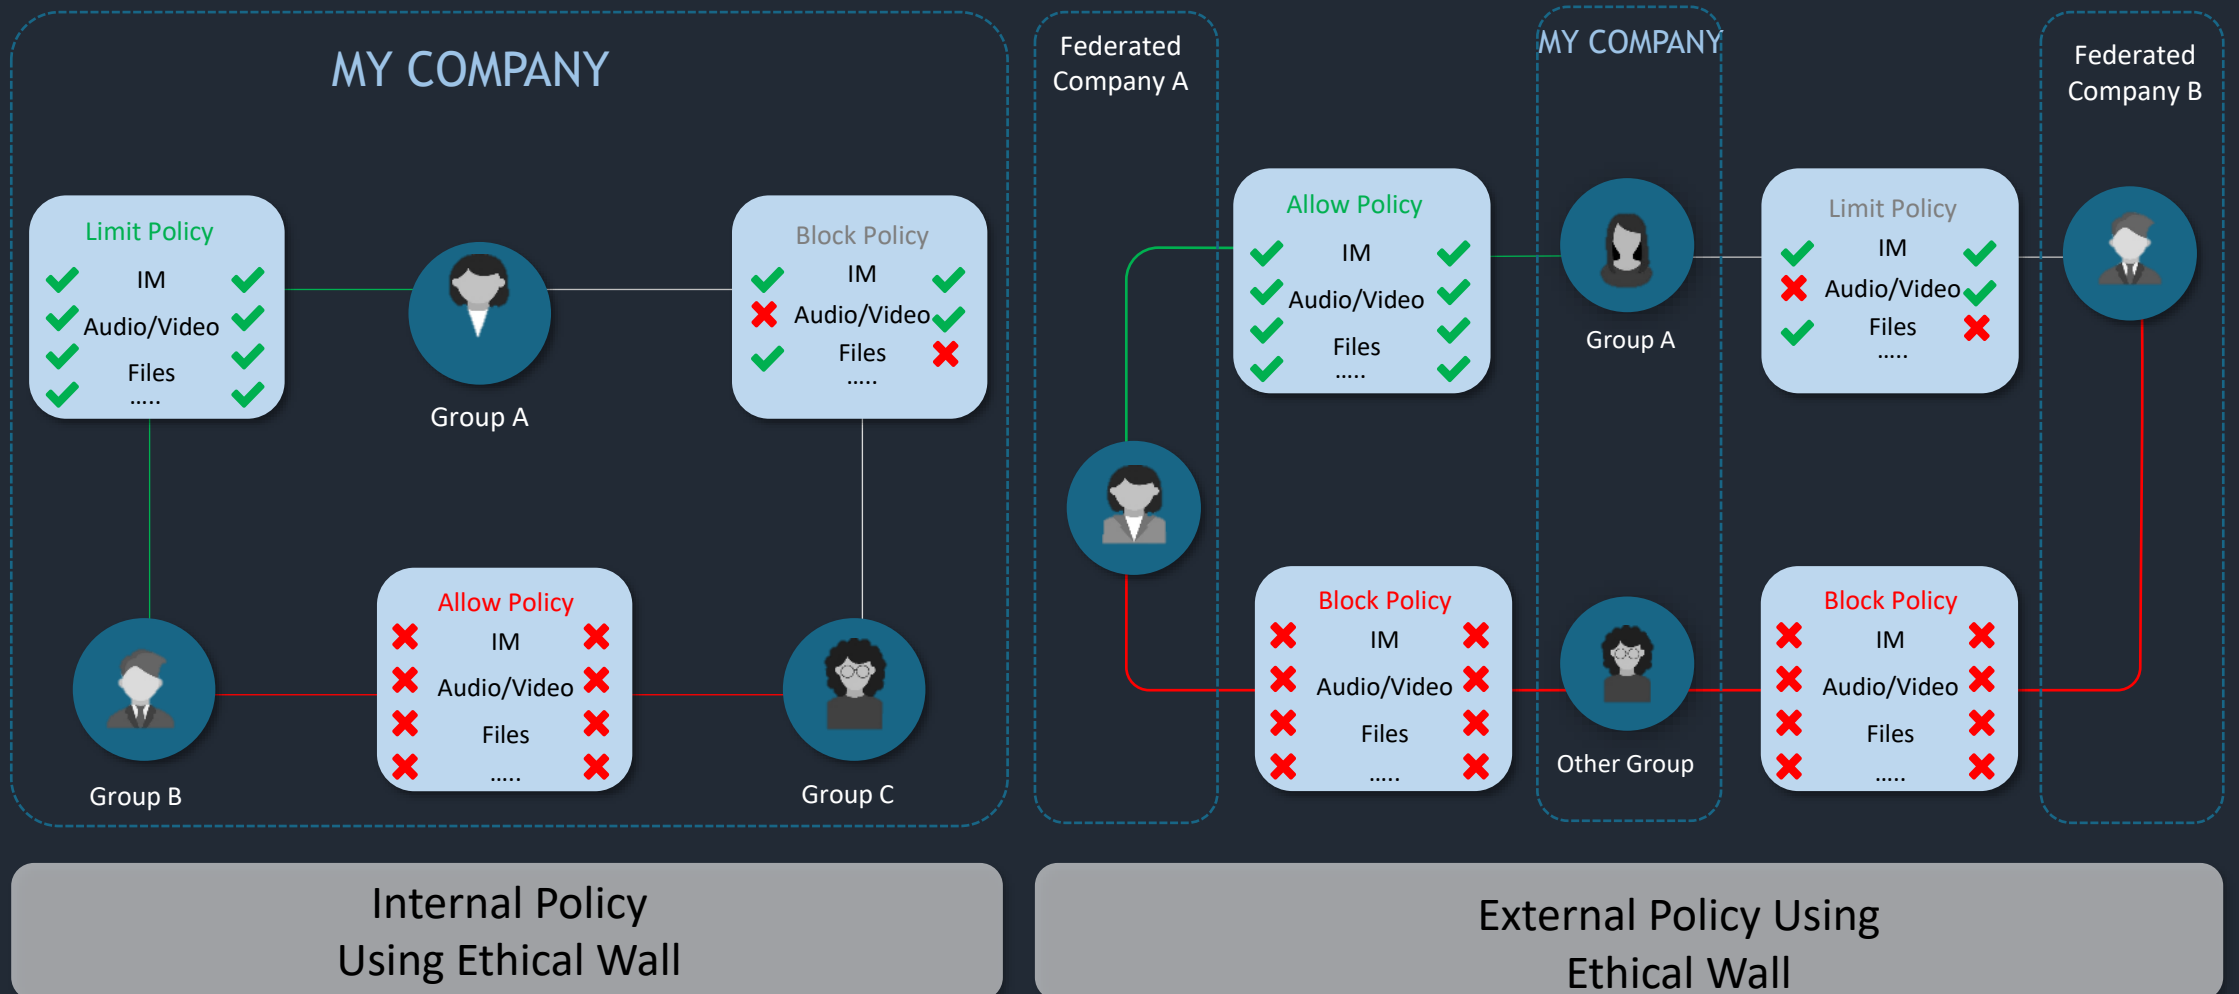

Internal communication between
different groups/users/domains/Spaces

Control specific collaboration options

Control communication
types between users
Including:
IM's,
file-sharing, Audio/Video/Screen-sharing

SAMPLE POLICIES: INTERNAL AND EXTERNAL

A woman with short dark hair and glasses is smiling and looking towards a man. The man is partially visible on the right side of the frame, looking down at something in his hands. They appear to be in a meeting or collaborative work environment. The image is overlaid with a semi-transparent blue filter.

PRE-VALIDATE MEETING

- SphereShield validates all meetings as soon as they are scheduled before they start
- The user violating the policy will be removed.
- A message will be sent to organizer.

FEATURES

- Covers all MS Teams scopes: Chat, Teams & Channels and meetings
- Analyze Webex meeting participants
- Notifications – Popups and In-context
- Auditing and reports for training and awareness
- Works like a firewall – scans policies from top to bottom

DLP INSPECTION

MAIN FEATURES

- Inspect messages, Files (Audio, Video inspection with Compliance Recording)
- Block, Mask, Notify
- Complete Scope – policies apply to Spaces/Chat/Meetings
- Create Granular policies based on External Traffic/ Users/Groups/Spaces.
- Notifications to end-user (in context or pop-up)
- Incidents are displayed in SphereShield Admin Portal along with content and users info. As well as links to eDiscovery

General DLP Demonstration

DLP INTEGRATION

Sending messages and files to existing DLP vendors or SphereShield DLP engine to meet existing policies. incidents will be displayed at the vendor's incident manager

McAfee[™]
Together is power.

Cybersecurity

DIGITAL GUARDIAN[®]

DLP ADDED ADVANTAGES

Active DLP - Preventing sensitive data being sent to the cloud and reaching destination

Prevent sensitive data from being sent to external users
Scan data shared with external / guest users

Taking advantage of existing DLP infrastructures,
experience and policies

Audio & Video Data Loss Prevention (Available with
Recording AI Compliance Analysis)

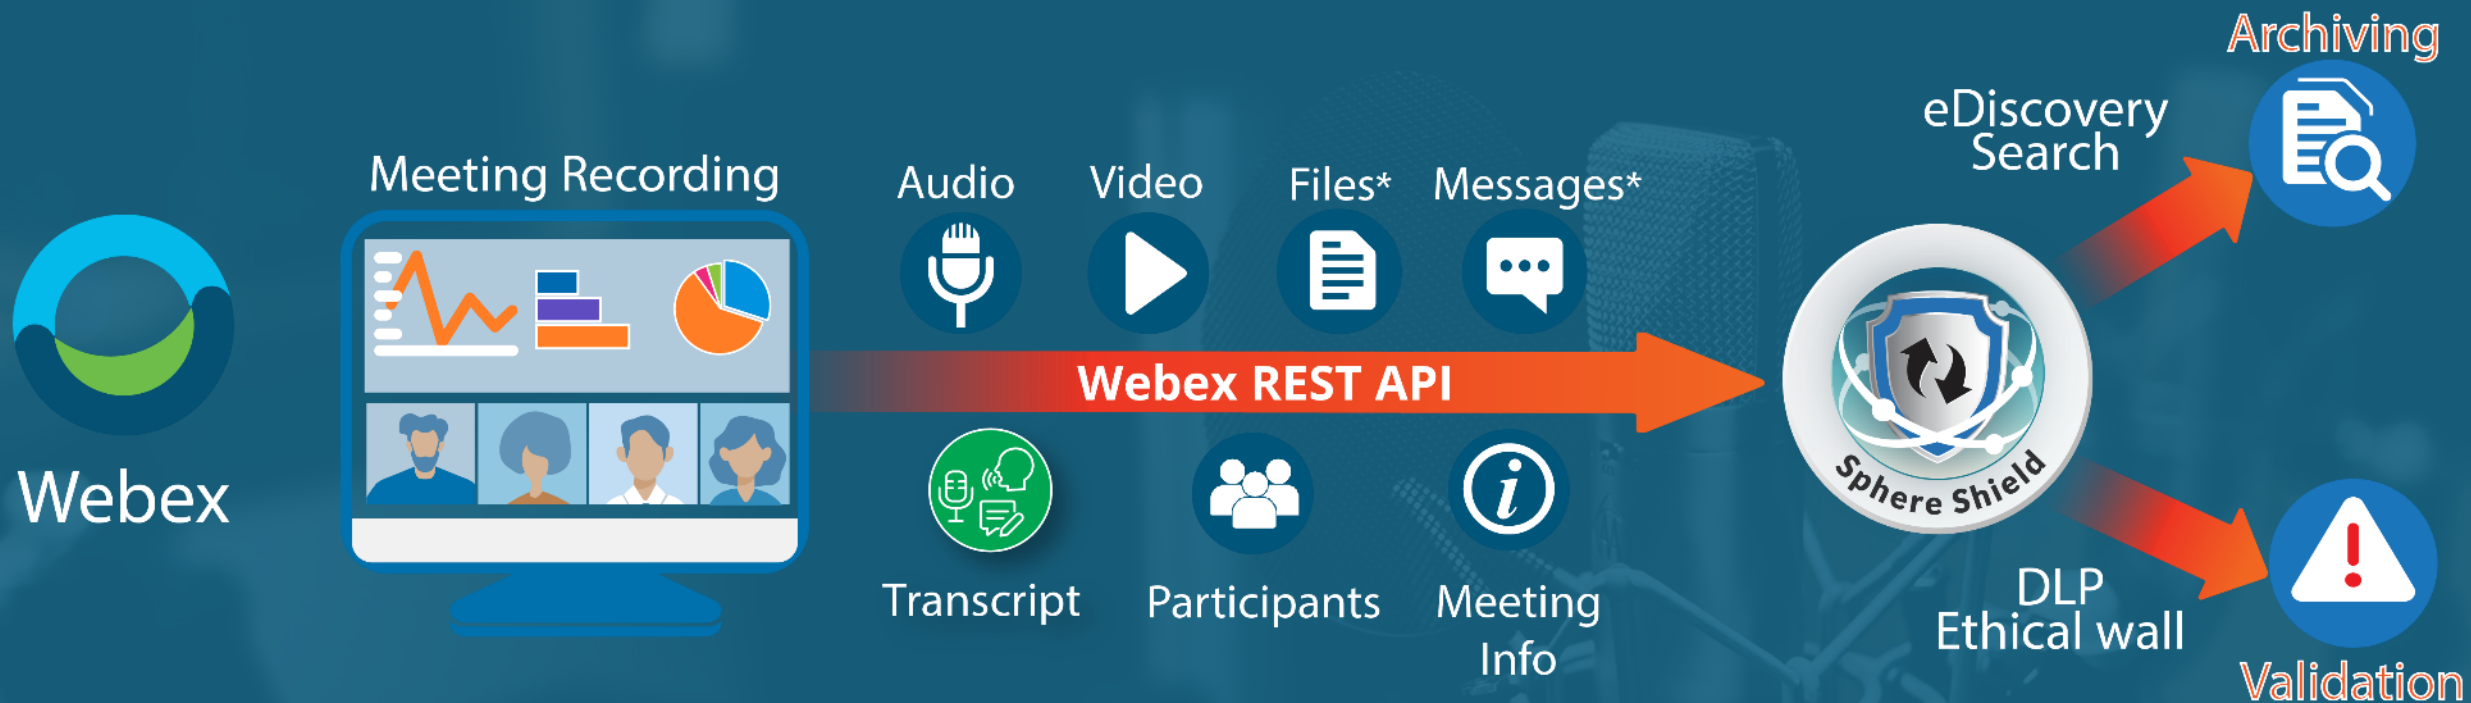

Inspect Files for Custom Rules

RECORDING AI COMPLIANCE ANALYSIS

OREC

RECORDING AND ANALYSIS

*Coming Soon

MAIN CAPABILITIES

- Enforce Recordings based on flexible policies
- Transcript of all users meeting audio
 - Converts speech to text in 70+ languages with automatic language detection
 - Speaker enumeration: which speaker spoke which words and when.
- Meeting eDiscovery - make meeting searchable by many parameters
- Automatically Inspect meeting content by DLP and Ethical Wall policies
 - Audio DLP via Audio transcript – Realtime!
 - Video DLP via On screen OCR from video and screen/document sharing
 - Links to eDiscovery
- On prem storage of Audio/Video Recordings
- Integrated with Leading DLP Vendors

The background is a dark blue gradient with several semi-transparent circular overlays. These overlays contain various icons and images: a person's hand holding a green marker, a group of white human figures, a location pin, a bar chart, a network diagram with nodes and lines, and a magnifying glass over a gear. The text 'ARCHIVE & eDISCOVERY' is written in a white, sans-serif font on the right side of the image.

ARCHIVE & eDISCOVERY

eDISCOVERY

- Archive data on cloud or on site
- Integrate with existing eDiscovery systems
- Search for personal information and export user data
- See message context in incidents
- Support files and Messages (Audio&Video Available with Recording AI Compliance Analysis)
- Meet GDPR and compliance requirements

RISK ENGINE

Meet security requirements

GEO FENCING

- Set Geo Fencing rules based on groups, domains or users.
- Allow, block or monitor access from specific countries.

MapSatellite

USER ENTITY BEHAVIOR ANALYTICS- UEBA

- Profile Teams usage (messages, files, hours, devices, IP etc)
- Detect anomaly
- Create and handle security events
- Examples:
 - Location change / Impossible traveler
 - Large data consumptions

ADDITIONAL SECURITY SOLUTIONS

- Threat protection – Anti Virus/Malware/Phishing
- Conditional Access – ensure that users can only log on from a managed device – e.g Blackberry, MaaS 360, Airwatch, Citrix

ROAD MAP

GOVERNANCE

- Control who can create a space
- Space Live cycle management – for how log data should be kept
- Auto archive inactive spaces
- List of Spaces and Members

WORKPLACE ANALYTICS

- List of active and non active spaces
- How many users in each space and if they are external users
- Automatic messages to encourage users to use the product
- User behavior trends and change notification
- Trends in spaces popularity by messages and users
- Identify Space champions
- Reports by Active Directory groups

SERVICE OFFERING

01 SaaS - online service
Customers don't need to install anything.
Each customer will have dedicated servers

02 A customer installation solution
Customers install SphereShield in their DMZ or
Cloud (e.g. Azure, AWS)

A Free Trial is available
