

ISEC7 MOBILE EXCHANGE DELEGATE

Highly effective mobile email management for better collaboration, higher functionality, and secure data storage – all in one app!

Overview

ISEC7 Mobile Exchange Delegate (MED) is the optimal solution to access your own e-mail mailbox and delegate mailboxes, public folders, shared calendars, and function mailboxes while on the move.

USE CASES

Increase the productivity of your employees with the most advanced email app:

- Access to e-mail, calendar, contacts, tasks, and notes in your own mailbox
- Integration of group and function mailboxes as well as public folders
- Support of delegates and deputy arrangements
- Secure access to contacts in the car (iOS)

ISEC7 MED is ideal for companies with personal assistants, teams with central mailboxes or public orders, external consultants, and organizations with functional/non-personal mailboxes.

FEATURES

ISEC7 Mobile Exchange Delegate is available for iOS and Android smartphones and tablets and offers numerous added values compared to a standard email app. The highlight is the multi-domain capability, which enables comprehensive access to mailboxes in several domains with identical permissions to your Outlook, including the following functions:

EMAIL

- Full access to your own mailbox
- Easy access to group mailboxes
- Use of deputy functions
- Integration of functional mailboxes and public folders

CALENDAR

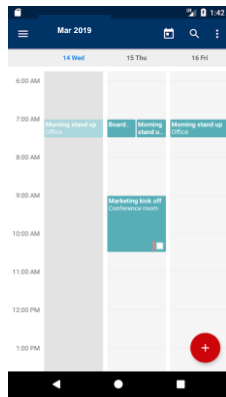

- Delegate calendar
- Group calendar
- Shared calendar

CONTACTS

- Access to contacts in delegate role and group mailboxes in public folders

TASKS and NOTES

- Use of tasks & note functions with essential status information and Microsoft® Outlook categories

WEB MEETINGS

- Join web meetings with one click
- Creation of web meetings for MS Teams mobile

CAR-KIT INTEGRATION

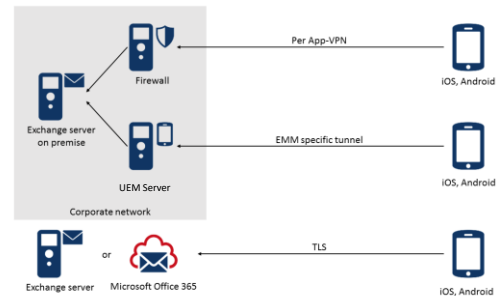

- GDPR-compliant display of contact information in the car phone without synchronization of contacts (only available for iOS)

ISEC7 MED – GOVERNMENT EDITION

- Special version for governments and authorities with extended security functions

ARCHITECTURE

ISEC7 MED integrates seamlessly into your existing Microsoft® Exchange or Microsoft 365 environment without middleware.

ISEC7 MED offers out-of-the-box integration into the leading Unified Endpoint Management solutions from BlackBerry, Ivanti, VMWare, Citrix, and Microsoft.

Companies that are already using a UEM solution can distribute and set up ISEC7 Mobile Exchange Delegate in the company in a very short time (approx. 2 hours).

The auto-discovery function enables the app to be set up fully automatically and the available mailboxes and authorizations to be taken over by the user at the push of a button.

SECURITY

ISEC7 Mobile Exchange Delegate has extensive security functions and is certified and used by numerous authorities and companies in highly secure environments.

Essential security features of ISEC7 MED:

- Seamless integration in UEM containers
- Support of S/MIME
- Authentication via login, SSO, or certificate
- Support for Red Network environments
- Virtual smartphone ready
- Development certified by Veracode
